Who we work with:

- Agents and Brokers
- Brand Partners
- Insurers and Reinsurers
- Underwriting Entrepreneurs

Building Together

MSI relies on distribution and capacity partners to develop and distribute its wide range of innovative insurance solutions for individuals and businesses.

Full-Stack MGA

MSI offers in-house services like an insurance company, including claims, customer service, underwriting, actuarial and analytics, and product management.

Advanced Tools and Technology

At MSI, we continually invest in market-leading tools, proprietary technology, and third-party data for risk evaluation, claims management, and portfolio underwriting.

Personal Insurance

MSI protects more than a million personal customers, wherever they may call “home.” Whether they are just starting out as renters, moving their family into a new-home community or live in an estate on the coast, we have solutions to meet their unique needs.

Professional Lines

When leaders of organizations ranging from fast-growing startups in crypto and cannabis to established community associations seek protection for risks arising from their roles, MSI and its insurance company partners provide specialized coverages to help keep these organizations up and running.

Commercial Insurance

Whether they’re businesses seeking flood coverage, community associations needing package policies and other key coverages, real estate owners requiring property and liability protection, or healthcare organizations insuring against cyber threats, MSI and its insurance company partners offer solutions to help manage their specific risks.

Alternative Risks and Other Solutions

MSI solves insurance challenges, whether it’s helping businesses take greater control over their risk management programs by self-insuring risks through a captive insurance structure, or by offering property owners and managers a master tenant liability policy for accidental, resident-caused damage.
